Fanzine Info

ChibiStuck started when I decided to draw Karkat as a chibi.

From there I drew the rest of the beta trolls as chibis.

All low to high. I wanted to put them together, with a few extras into an art fanzine.

What Is Chibi?

Chibi is an art style that originated from Japan. The art style mainly consists of giving characters a large head and smaller body, giving a type of bobble head look.

Not all chibi styles look the same. You can customize a chibi style quite a bit, like giving it a bigger head or more exaggerated features.

Clarifications

Yes, you may use the artwork here as your phone Backgrounds for free and share the art, but with sharing please give credit!

With All That Said...

Please enjoy the cute, kawaii world of **ChibiStuck!!!**

WHAT IF HOMESTUCK HAD NENDOROIDS?!

(NENDOROIDS ARE CHIBI FIGURES)

ChibiStuck Progress Sketches

Creator Notes:

So I wanted to add this at the end, because these
Are just some behind the scene tidbits from working
on ChibiStuck.

My Favorite Troll to do: As much as I love Kar, my
Favorite troll to create for chibi stuck was Feferi. I just have
A soft spot for pink and massive hair. Even tho Fef was my
Favorite troll to draw, I still love Kar and Terezi.

Which Troll did I struggle with the most?: It was
A tie between Vriska and Aradia. The main struggle is that
I wanted each characters personality to shine through,
mainly with the pose and facial expressions. But coming
up with something for these two was kinda difficult,
so hopefully I did a good job.

Anything I would change?: The one thing I would
change would be the posing. You can tell by the time
I got to Gamzee there was definitely more dynamic
poses to the characters. That's because I was so
hell bent on making them look cohesive with each other
That some became stilted and I wish I would have given
myself more freedom.

Any more ChibiStuck?: Do you want
more? If yes then... Guess who's getting
drawn in a maid outfit.
